

# Steven's Multi-Cane

IMAGINE IF JAMES BOND HAD A CAIN...

(Early picture for first prototype out of PVC so we can work out specific dimensions and where to hang various features. Other gadgets not yet drawn including excersize versions with excersize bands likely qualified to be paid for by Medicare/insurance, Modular features like fishing pole, grappling hook, super highpower high accuracy slingshot, paintball & many additional features. Key features intentionally left out such as law enforcement & CIA etc for security purposes)

A=Big enough round hook arm. Note how extra hook counter balances cane for lightning fast martial arts & other applications or simply helping those with weak wrists & allows holding various items

Note: 45 angle smooth round tip

B= Big enough to go around a large neck and for two hands to grip if they want to

C=4-way adjustable top swivel handle-

C2=Hollow for LED light

D=4-way adjustable angle hook capable of holding luggage, shopping bags, blocking weapons and also can hold CO2 cartridge for related applications.

E=adjustable bottom hook

F=Inside concealed tip 45 degree cut for cutting seat belt

G= Adjustable bottom hook concealing knife

H=Telescopic seam

I= Window piercing tip

J= not shown includes additional modular/expandable features including excersize systems(with related short & large excersize bands), Fishing pole, Taser for dog attacks, high powered slingshot, grappling hook, paintball & many other appls including for police, military ,CIA.Special Ops etc...
